

SMARTBOX™ H Series

In-line Helical Gear Reducers

Motovario SmartBox™ was designed to be the most competitive high-efficiency gear reducer series in today's market.

The Modularity Concept of Motovario SmartBox™ means modular production and modular assembly for modular gear reducers. SmartBox™ is built with standardized parts, sharing gears, shafts, input sets and output shafts and flanges. SmartBox™ gear reducers are easily adapted for any application.

Contact Advanced Industrial Devices for pricing and design assistance. To help with selection we will need you to provide the following information:

1. Horsepower requirement of the application
2. Type of application
3. Hours per day of run time
4. Is the input to the gear reducer direct coupled to the motor or is it connected to it by a coupling, sprocket or sheave
5. Output speed requirement of the reducer
6. Overall space available to mount the reducer or gear motor
7. Output flange, synthetic lubrication, special paint or other unique requirements
